MPLA Community Manager Report
10/12/08

I have only a small amount of visible updates to the online community.

Updates include:
WordPress Blog
• Upgraded WordPress through two upgrades 2.6.0 and 2.6.2
• Redeveloping user management scheme. User management and authentication changed in version 2.6.x
• Backups created prior to upgrades
PunBB Discussion Fourm
• Security Patches added to PunBB. (User purge and User management)
• Backups prior to patches.
Work on www.mpla.us
• Developed php scripts for all 14 web forms currently on mpla.us. Will be necessary for movement to server.
• Worked with Dan on :
o New template
o Modifications to memberclicks login

I am hoping Dan will have the template upgrade done so we can move site to server.
