Applications.

Continuing to use the LimeSurvey with great success. Each election/survey has an
increasing response rate. All applications are up to date, secured and functioning
well.

Servers

Maintaining backups and monitoring all activity. Occasional fake accounts on
meet.mpla.us but the spam filter and notifications are functioning great. I get an
email on each attempt and I delete the fake accounts.

Reminder:

Use your mpla.us email address. If you do not like to use another webmail client,
you have two choices:

1. I can help you set it up for outlook or the mail client that you are currently
    using.
2. I can set up the server to forward the email to your primary email account.

Using the mpla.us emails creates a sense of permanence to mpla offices and
positions. (ie president@mpla.us versus FredFlintstone@bedrock.edu)
