

Portal Administrator Report  
Roy Degler  
March 2012

## Portal Applications and Support Sites

### Current Projects:

- Back ups are up to date.
- Some MPLA emails were used for spamming by a Chinese hacker. I did not use secure enough passwords for setting up the accounts. All MPLA passwords were reset using a secure password generator. I feel this will thwart this type of attack in the future.

### Future Tasks:

- I will be helping Dan upgrade our version of Machform. This will require a back up of the individual components of the current installation, including all scripts, settings and data. Back ups will be used to make a duplicate to test the upgrade process. Once that is successful, I will upgrade the live production version. The new version of Machform will include PayPal integration.
- Preparing for upcoming MPLA elections. I will upgrade our version of LimeSurvey and build templates for the election.

### Suggestions:

- Dan and I are still planning on moving to a content management system for the MPLA website.
