Board Report Archive Conversion

I've completed converting Board Reports to PDF for everything except Committees and States. I've been converting old board reports from HTML to PDF to cut down on my behind the scenes activity. The Board Reports Archive contains the most HTML files on the website and by converting everything to PDF, it will mean less things for me to "touch" when we change style sheets and design templates.

2010 Election

Roy and I have had some preliminary discussions about the 2010 Elections, to be conducted online once more. Last year's election worked well, we believe. We intend to run it similarly. Working back on the calendar, we are ready and awaiting the slate of candidates from the Nominating Committee. I would assume we'll be opening up the election online in mid-February (assuming I have the timetable down.)

Respectfully submitted,

Dan Chaney
