MPLA Webmaster Report
18 April 2019

Completed/Ongoing Activities

I upgraded Modx to version 2.7.1, without creating any issues with the calendar plugin and resulted in a more stable and secure website. Updated Machform to version 11 to eliminate deprecated error appearing on some form pages.

Set up Google email and drive apps for some committees.

Working to keep the job line, announcements, board reports and other content uptodate.

Proposed Changes

Go live with Google email this summer. Still need to test gmail SMTP settings in Machform, our form processor. If the gmail SMTP settings work with MachForm, MPLA can transition to Gmail and Google Drive after training and best practices established by archives committee.
